D812
Enterprise IP Phone

The Snom D7812 SIP Color Deskset combines intuitive design with cutting-edge technology and connectivity. It boasts a 5” 480 x 272 pixel color LCD display surrounded by eight programmable feature keys, which can be easily navigated through four pages using a dedicated button. With Power over Ethernet (PoE) support and dual Ethernet ports, the system is both cost-effective and user-friendly. A USB port enhances connectivity, supporting accessories such as a WiFi dongle, or the D8C expansion module for increased functionality and one-touch options. The system offers versatile configurations, featuring eight programmable feature keys, four soft keys, and 15 dedicated feature keys.
